Osamah Almaweri

Dearborn, MI | 313-663-5017 | osamahalmaweri@gmail.com | www.osamahalmaweri.com

Professional Summary

Network and Systems Administrator with nearly 7 years of experience building and supporting Windows Server and Active Directory environments, from Server 2008 through 2025, across small businesses, nonprofits, and regulated dental, medical, and tax offices. Designs multi-site networks on Cisco, Palo Alto, Fortinet, and UniFi, with site-to-site VPN, redundant domain controllers, and Microsoft 365 with Entra ID. Known for phased migrations and zero-downtime cutovers, and experienced supporting HIPAA-regulated practices.

Work Experience

Quality Restaurant Equipment Masters | Oak Park, MI
Network and Systems Administrator | Feb 2023 - Present

- Administer the company network, Windows servers and workstations, firewalls, switches, wireless access points, and surveillance system
- Migrated the company's Windows Server 2008 R2 environment to a new Windows Server 2019 server in planned phases, using DFS Replication to move data with no loss, and repurposed the legacy server as a redundant server
- Deployed and configured the company VoIP system end to end for 7 users, including soft phones, auto attendant, simultaneous ring to mobile, holiday and after-hours routing, voicemail, and overhead paging to the warehouse
- Standardized patch management using Syncro RMM and Group Policy for workstations, with manual patching for legacy Windows Server 2008 R2 systems, keeping updates on a regular schedule
- Built a custom Python inventory application with barcode scanning, CSV import/export, and a packaged Windows executable; leading its integration with the WooCommerce site and QuickBooks Desktop
- Leading the move of the company website from quote-only to online checkout on WooCommerce, with Authorize.net payments, shipping, and local pickup
- Created a centralized IT documentation and knowledge base across departments, standardizing records and speeding up information retrieval

1010 IT Solutions LLC | Dearborn, MI
IT Consultant (Part-Time) | Apr 2021 - Present

- Over a single weekend, connected a dental practice's new second building with a wired link and a wireless bridge as failover, extending the domain and practice systems to about 30 workstations with no disruption to patient care
- Built a three-site Active Directory domain for a tax and law firm of about 20 users, with redundant domain controllers over site-to-site VPN, and enforced Group Policy controls against data exfiltration (blocking USB storage, restricting file copying) to protect sensitive client records
- Designing and deploying the full network, server, and AV infrastructure for a religious center and school with about 50 users, including streaming cameras, multi-display video distribution, and student security controls
- Configured site-to-site VPN and DICOM settings across a three-site medical practice, working with a partner radiology office to enable secure X-ray and imaging transfers
- Migrated a 6-user accounting firm to Microsoft 365 on its custom domain, configuring mail DNS records, Entra ID, enforced MFA, and license assignment, and set up a standard onboarding process for new users
- Maintained a dental office's legacy Windows Server 2012 environment for over a year while helping transition the practice to a newer server
- Drafted service level agreements, HIPAA business associate agreements, and client service contracts, reviewed by legal counsel, and maintain them annually
- Support dental and medical offices with HIPAA-aligned security; manage Microsoft 365 licensing as a Sherweb CSP partner and endpoints through Syncro RMM/PSA
- Design client-specific backup and recovery plans combining local NAS and cloud backups to protect data and limit downtime

Alhuda Islamic Association | Dearborn, MI
IT Infrastructure Lead | May 2020 - Present

- Lead all IT for the organization, including network, servers, security systems, AV, and procurement; began as a volunteer, grew into the lead role, and guide volunteer technical teams through cutovers
- Manage a Cisco network with a Palo Alto firewall and Layer 3 core switch, segmented into VLANs for staff and services
- Administer the Windows Server 2019 domain controller and file server for 10-20 users; resolved domain-join and DNS failures and added a Hyper-V virtual domain controller for redundancy
- Onboarded the organization's domain to Microsoft 365 and configured Entra Connect Sync for hybrid identity
- Designed a 500-foot wireless bridge extending the network to an outdoor event area, then redesigned it the next year with dedicated video transmission and frequency separation for a drop-free livestream
- Restored classroom connectivity after a network cutover by isolating affected users on a temporary VLAN, then traced the root cause to a firewall ACL blocking DNS and DHCP
- Produced a live-streamed fundraising platform that generated $373,000 in donor contributions; manage PTZ cameras, NDI decoders, digital signage, and a 32-channel NVR

Islamic Center of Detroit | Detroit, MI
IT Technician / IT Coordinator | Dec 2019 - 2024

- Trained on Cisco network infrastructure as a technician and advanced to IT Coordinator, supporting a headquarters site with 50+ users and several satellite locations
- Led the cutover from aging Cisco devices to a Fortinet environment with zero production downtime, improving security and site reliability
- Configured secure remote access using SSL VPN integrated with RADIUS and LDAP authentication
- Implemented security standards, documentation, and system procedures, reducing troubleshooting time and improving onboarding
- Provided network and AV support for large-scale events with 1,000+ attendees
- Worked with department heads on projects over five years, and managed vendor relationships and procurement contracts to reduce IT costs

Skills

Network design and segmentation, Windows Server and Active Directory, Microsoft 365 and Entra ID administration, Backup and disaster recovery, Cutover and migration planning, Technical documentation, HIPAA and regulatory compliance, Vendor management and procurement, Project management

Technologies

Cisco, Palo Alto, Fortinet, Ubiquiti UniFi, TP-Link Omada, Grandstream, Windows Server 2008–2025, Active Directory, DNS, DHCP, Group Policy, Hyper-V, VMware, Microsoft 365, Entra ID, Entra Connect Sync, VLANs, Routing, Switching, Site-to-site and SSL VPN, RADIUS/LDAP, VoIP, Syncro RMM/PSA, PowerShell, Python, EVE-NG

Education

Bachelor of Arts in Philosophy | University of Michigan–Dearborn | Dec 2025
GPA 4.0 | President, Philosophy Club | Focus: logic and systems, AI ethics
Associate Degree in Biology | Henry Ford College

Certifications

Cisco Certified Network Associate (CCNA) | Expected Nov 2026
Microsoft AZ-802 | Expected Jan 2027
CompTIA A+
CompTIA Server+
Google Project Management Certificate
HIPAA Business Associate Training; HIPAA IT Professional Security Training
